Suruthi S

SDET | QA Automation Engineer
Chennai, India | +91 9952087238 | suruthi2817@gmail.com | linkedin.com/in/suruthisaravanan

SUMMARY

SDET with nearly 4 years of experience in test automation and quality engineering for prop-tech, banking, and enterprise applications. Builds **test automation frameworks from scratch** in Python with **Playwright, Selenium WebDriver, Behave BDD**, and Requests, plus PostgreSQL validation and **Jenkins CI/CD**. Owns end-to-end testing of microservices from planning to release sign-off, mentors junior engineers, and is prototyping **AI-assisted test automation**.

SKILLS

Programming: Python, SQL, Data Structures & Algorithms (DSA)
UI Automation: Playwright (Python), Selenium WebDriver, Appium (Mobile)
BDD & Frameworks: Behave BDD, Gherkin, Page Object Model (POM), Data-Driven Testing
API Testing: REST API Automation, Python Requests, Postman, GraphQL
Database: PostgreSQL, Database Validation
CI/CD & Tools: Jenkins, CI/CD Pipelines, Git, GitHub, Allure Reports
AI in QA: Playwright MCP, Claude API, AI-Assisted Automation (POC)
System Design: Fundamentals, HLD, LLD
QA Practices: Functional, Regression, Integration, End-to-End, Release Validation, Defect Lifecycle, Root-Cause Analysis

PROFESSIONAL EXPERIENCE

Software Test Engineer Dec 2024 - Present
PROPERTY AUTOMATE

- **Architected UI and API automation frameworks** using Playwright and Requests for PropGoto, a prop-tech rental and listing platform, growing coverage to **800+ automated test cases** with reusable page objects.
- Automated **55 REST APIs** across PropGoto Gateway services and micro applications, pairing Playwright UI flows with API checks on status codes, payloads, and business rules.
- Implemented **BDD suites with Behave** (Gherkin feature files and step definitions) and Selenium WebDriver for Gateway business workflows.
- Validated backend data integrity in **PostgreSQL** with SQL queries, confirming UI actions and API responses persist correctly.
- **Configured Jenkins CI/CD pipelines** to run regression suites on builds, **cutting regression time from 2 days to 4.5 hours**, with Allure reporting and Git/GitHub version control.
- Led functional, integration, and regression testing for features and bug fixes, driving defects through root-cause analysis and retesting to **release sign-off for 2 production releases per month**.
- Prototyping an **AI-assisted test automation POC (ongoing)** with Playwright MCP and Claude API, exploring LLM-driven browser interaction and AI-generated scenarios.
- Mentored **4 junior QA engineers** in API testing, Playwright and Selenium automation, and defect reporting.

Quality Analyst Dec 2023 - Dec 2024
XERAGO

- Automated functional flows for the Acquigo web application using **Selenium WebDriver and Behave BDD** in Python; wrote Python scripts validating **GraphQL APIs** and RPA workflows.
- Validated REST APIs with Postman and automated API checks for the **Ujjivan Digital Account and Ujjivan Diksha** banking projects.
- Managed QA for EDM campaigns, redirections, vanity URLs, and staging releases on the Citibank account.
- Executed manual and automated regression for the LMS project.

Associate QA / Programmer Analyst Jul 2022 - Jun 2023
RAMCO SYSTEMS

- Designed **1,500+ test cases** for the ORICA project and automated key scenarios using **Selenium WebDriver and Behave BDD**.
- Automated validation of Malaysia Statutory modules and customer ticket handling.
- Conducted mobile QA of the Ramco Unify app using **Appium**; validated Employee Induction and HR Setup modules.

EDUCATION

Master of Science in Information Technology 2020 - 2022
Women's Christian College, Chennai

Bachelor of Science in Mathematics 2017 - 2020
Madras Christian College, Chennai
